

Recent work within the R-INLA project

Haavard Rue

Department of Mathematical Sciences
Norwegian University of Science and Technology
N-7491 Trondheim, Norway

In this talk, I will give an overview of our recent work within the R-INLA project (www.r-inla.org), with the goal of constructing more sensible default (joint) prior distributions for latent Gaussian models, giving comparable measures of sensitivity of results wrt assumptions, and how we can “robustify” the results/models.
